

MAVERICK GENERATORS

About us

Maverick Generators was established in 2007 and it has since earned an excellent track record, with many satisfied clients across Southern Africa.

We are a manufacturer of diesel generators from 20kVA to 2000kVA, synchronization plants up to 5000kVA and custom built distribution, and control panels.

It remains a business where attention to detail and customer service remains the first priority.

Our manufacturing plant in Pumulani, Pretoria offers top class facilities for the manufacturing, assembly and testing of our units.

Maverick Generators is proud to offer high quality generating sets for a wide variety of applications.

In the big power output range, we offer generating sets powered by Volvo Penta, Scania, Perkins, Cummins, Deutz, John Deere, Lovol and many other well-known brands which are all purpose built to the client's needs and assembled to the highest specifications possible.

We are currently approved as OEM manufacturers by Volvo Penta, Scania and Cummins.

Our main priority is the client's satisfaction, and offering a service that will build life-long relationships with our customers and distributors of our products.

Our goals are to offer the best service possible in the industry, specializing in the following fields:

- Fast turn-around times on quotations and enquiries at all levels.
- Getting the best possible pricing and structuring deals according to the needs of our clients.
- Providing high quality units.
- Offering a comprehensive warranty on all the units sold by us.
- Offering various options such as maintenance plans, service plans and such as required by the customer.
- Operating across Africa with branches/service agents in most countries.
