

MAVERICK GENERATORS

COMPANY PROFILE

Maverick Generators was established in 2007 and has since earned an excellent track record, with many thousands of satisfied clients across Africa.

We are a South African based manufacturer of diesel generators from 14kVA to 2500kVA, synchronization plants up to 20MVA and custom built automatic mains failure, synchronization and generator control panels.

It remains a business where attention to detail, quality and customer service remains our first priority.

Our manufacturing plant in Pumulani, Pretoria offers top class facilities for the manufacturing, assembly and testing of our units.

Maverick Generators is proud to offer high quality generating sets for a wide variety of applications.

In the big power output range, we offer generating sets powered by Volvo Penta, Scania, Perkins, Cummins, Deutz, John Deere and Lovol these units are built and assembled to the highest specifications possible.

We are currently approved as an OEM (Original Equipment Manufacturer) by Volvo Penta, Scania and Cummins.

Our main priority is the client's satisfaction, and offering a service that will build life-long relationships with our customers and distributors of our products.

Our goals are to offer the best service possible in the industry, specializing in the following fields:

- Fast turn-around times on quotations and enquiries at all levels.
- Getting the best possible pricing and structuring deals according to the needs of our clients.
- Providing high quality units.
- Turn-key projects.
- Offering a comprehensive warranty on all the units manufactured by us.
- Offering various options such as maintenance plans, service plans and such as required by the customer.
- Operating across Africa with branches/service agents in most countries.
